

Child and Adolescent Mental Health Studies (CAMS) Minor Non-departmental Approved Courses

In order to complete the CAMS minor, students must take five courses. At least three of these courses must be selected from amongst the offerings of the CAMS Minor itself within the NYU Department of Child and Adolescent Psychiatry (NYU Child Study Center). The remaining two courses can also be CAMS courses or may be taken in other departments (ranging from three to six points each). Courses have been identified which serve the mission of the CAMS Minor. Courses taken for the CAMS Minor cannot be applied to another major or minor (e.g., no “double-dipping” is allowed), and the converse is also true, such that courses taken to complete another college major or minor cannot be applied to the CAMS Minor without prior approval. Those courses which may currently be applied to the CAMS Minor include:

College of Arts and Sciences:

Neural Science

V80.0100, *Introduction to Neural Science*, given every fall, 4 points.

V23.0202/V80.0202, *Behavioral and Integrative Neuroscience*, given every spring, 4 or 6 points.

Psychology
